

## Promises and problems of PoCUS

Date: Wednesday 20 October 2021  
RCEM accredited for CPD  
GMC domains covered: 1 2 and 3

Ultrasound has become increasingly embedded as a vital skill for all front-line clinicians. Its portability and reduced radiation, allied to its ability to assist in making diagnoses and assisting procedures, make it ideally placed for use in EM.

This study day will explore how PoCUS began, where we are now, and what we can look forward to in the future, with sessions and panel discussions from renowned national and international speakers.

### CPD certificates

CPD certificates will be sent to those who attended the live session ten working days from the end of the event. Please note, you are required to attend the live event in order to receive your CPD certificate.

### Who should attend?

- Acute front line clinicians with an interest in improving their ultrasound knowledge and skills.
