

28 April	Track 1 (F2F and virtual)	Track 2 (F2F and virtual)	Track 3 (F2F only)	Track 4 (F2F only)
08:30 - 09:30	Registration			
09:30 - 11:15	Keynote sessions Stay tuned - exciting keynote speakers coming soon, set to inspire, challenge, and spark fresh thinking across emergency medicine.			
11:15 - 11:45	Refreshment break			
11:45 - 13:00	Free papers Hear the top scoring oral abstracts - an exciting session exploring cutting-edge emergency medicine research with a prize available for the winning presentation.	Resus updates: 4 minutes to save a life in fatal anaphylaxis A dynamic session with on-stage simulation, and discussion of the latest guidelines.	Rapid fire diagnostics Get involved and test your knowledge at this interactive session looking at ECGs, rashes, blood gases and ultrasounds.	Influencing the next generation Meet the rising stars of emergency medicine as they share how they learn, create, and shake up traditional medical education.
13:00 - 14:00	Lunch			
14:00 - 15:15	HALO sessions: Resuscitative hysterotomy With an on-stage simulation, this is day one's interactive HALO session in which you'll see an expert demonstration of the procedure, discussion of the latest evidence, and an interactive debate that you can get involved with.	Core EM: Recent updates and diagnostic challenges Dive into the latest emergency medicine breakthroughs and tackle real-world diagnostic dilemmas with expert insights and case discussions.	Research for all Discover how to embed research into your department and everyday emergency care, empowering teams to innovate, collaborate, and drive evidence-based improvements.	Planning for the last 10 years of your career Navigate retirement prep, NHS pensions, and staying inspired. Practical insights to shape a fulfilling final chapter in emergency medicine.
15:15 - 15:45	Refreshment break			
15:45 - 17:00	PEM Elevate your paediatric knowledge and become more confident in managing children in the emergency department with a mix of research and clinically focussed talks.	Global health Explore emergency medicine research that has taken place in low- and middle-income countries, highlighting innovation, collaboration, and context-driven solutions to global challenges.	Wellbeing Examine personal and team wellbeing in emergency medicine, sharing strategies to foster resilience, support, and sustainable departmental culture.	Lightning papers Fast-paced and focused. Oral abstract presenters deliver their research in just five minutes, sparking ideas and questions in rapid succession.
17:00 - 18:00	Drinks reception			

29 April	Track 1 (F2F and virtual)	Track 2 (F2F and virtual)	Track 3 (F2F only)	Track 4 (F2F only)
08:45 - 09:30	Registration			
09:30 - 11:15	Keynote sessions Stay tuned - exciting keynote speakers coming soon, set to inspire, challenge, and spark fresh thinking across emergency medicine.			
11:15 - 11:45	Refreshment break			
11:45 - 13:00	Big three studies Unpack key findings from SWIFT, CoMiT-ED 1, and UNCORKED. Three landmark studies shaping emergency medicine research and practice.	Vulnerable populations and health inequalities Explore disparities in emergency care, focusing on vulnerable groups and strategies to promote equity, access, and inclusive clinical practice.	Medicolegal Uncover key ED legal cases, and coroner insights at this session offering essential lessons in risk, accountability, and clinical vigilance.	Resus updates: Cardiac arrest Review the latest cardiac arrest research, with evidence-based updates to resuscitation strategies, clinical practice, and patient outcomes in the ED.
13:00 - 14:00	Lunch			
14:00 - 15:15	HALO sessions: ECPR With an on-stage simulation, this is day two's interactive HALO session in which you'll see an expert demonstration of the procedure, discussion of the latest evidence, and an interactive debate that you can get involved with.	Core EM: Recent updates and diagnostic challenges Dive into the latest emergency medicine breakthroughs and tackle real-world diagnostic dilemmas with expert insights and case discussions.	Death and dying Improve compassionate end-of-life care in the ED.	Lightning papers and undergraduate awards Fast-paced and focused. Oral abstract presenters deliver their research in just five minutes, sparking ideas and questions in rapid succession. Plus hear from the winners of the undergraduate essay prizes.
15:15 - 15:45	Refreshment break			
15:45 - 17:00	RCEM grant updates Grant recipients share progress and insights from funded research, showcasing innovation, impact, and future directions in emergency medicine.	Environmental impact From GreenED to global insights. Explore practical wins, cost-saving strategies, and climate-conscious care in emergency medicine's evolving landscape.	Management challenges Tackle real-world ED leadership dilemmas through interactive cases. Ideal for new consultants and those stepping into senior roles.	Early EM career considerations Navigate exams, portfolio pathways, and IMG experiences. This session will offer practical guidance for building a successful start in emergency medicine.

30 April	Track 1 (F2F and virtual)	Track 2 (F2F and virtual)	Track 3 (F2F only)	Track 4 (F2F only)
08:45 - 09:30	Registration			
09:30 - 11:15	Keynote sessions Stay tuned - exciting keynote speakers coming soon, set to inspire, challenge, and spark fresh thinking across emergency medicine.			
11:15 - 11:45	Refreshment break			
11:45 - 13:00	HALO sessions: Thoracotomy With an on-stage simulation, this is day three's interactive HALO session in which you'll see an expert demonstration of the procedure, discussion of the latest evidence, and an interactive debate that you can get involved with.	Mental health Address adolescent mental health in the ED and strengthen collaboration with external agencies for safer, more effective patient care.	Research studies reporting Learn how key emergency medicine studies translate into practice, with the chance to question researchers on methods, impact, and implementation.	Moderated papers Rapid-fire research. Oral abstract presenters deliver concise, three-minute insights into their work, showcasing innovation in EM.
13:00 - 13:45	Lunch			
13:45 - 15:30	Analgesia and Top of the Blocks Master key nerve blocks for FRCM, review NAP8 findings, and explore cutting-edge analgesia research for emergency care excellence.	AI and digital transformation Discover how AI is reshaping emergency departments in this exciting session. From clinical decision support to workflow optimisation and future-ready digital innovation.		
15:30	Close of conference
