

28 April	Track A (F2F and virtual)	Track B (F2F and virtual)	Track C (F2F only)	Track D (F2F only)
08:45 - 09:30	Registration			
09:30 - 11:15	A1: Keynote sessions			
	Welcome remarks			
	President's address Dr Ian Higginson			
	A day in the life of an EM physician			
11:30 - 12:00	Refreshment break			
12:00 - 13:15	A2: Free papers	B2: Resus updates: 4 minutes to save a life in fatal anaphylaxis	C2: Rapid fire diagnostics	D2: Influencing the next generation
	Hear the top scoring oral abstracts - an exciting session exploring cutting-edge emergency medicine research with a prize available for the winning presentation.	Anaphylaxis Resuscitation guideline update Dr Andrew Lockey	ECGs Dr Hesham Ibrahim	From local to national: Scaling a journal club to transform critical appraisal education Dr Umer Hakeem
		Using the NCDM to determine mechanism of death in children who have died of anaphylaxis Dr Tom Roberts		Educating generation AI Professor Simon Carley
		AMAX4 Simulation Dr Ben McKenzie and Dr Tom Roberts	Get involved and test your knowledge at this interactive session looking at ECGs, rashes, blood gases and ultrasounds.	Educating the next generation Dr Omar Hafeez-Bore
		Panel Q&A		
13:15 - 14:15	Lunch			
14:15 - 15:30	A3: HALO sessions: Resuscitative hysterotomy	B3: Core EM: Recent updates and diagnostic challenges	C3: Research for all	D3: Planning for the last 10 years of your career
	An interactive HALO session in which you'll see an expert demonstration of the procedure, discussion of the latest evidence, and an interactive debate that you can get involved with.	Weight loss injections Dr Sri Bellamy	Why research is vital in EM Professor Matt Reed	Practical considerations Dr Jocelyn Britliff
		Understanding ketamine use disorder Dr Ijeoma Chibuzo and Dr Rebecca McKnight	Culture club: How to build and develop a research ready team Professor Heather Jarman	
		Dr Stephanie Cowan, Dr Kim Hinshaw, Dr Caroline Leech and Ms Camella Main	Diagnosis and management of PE in the ED Professor Daniel Horner	Stung by the research bug: How to make EM research irresistible to trainees Dr Rajendra Raman
			Grassroots to greatness: How we turned a non-academic ED into a research active team Dr Mohammed Elwan	Maintaining motivation and direction Dr Lois Brand
				The trainee perspective: My CONCEPT API experience Dr Olivia Lobo
		Panel Q&A	Panel discussion	Panel Q&A

15:30 - 16:00	Refreshment break			
16:00 - 17:15	A4: PEM	B4: Global health grant updates	C4: Wellbeing	D4: Lightning papers
	PEM cardiac case Dr Hannah Cooper, Dr Tristan Ramcharan and Dr Jake Turner	A survey of vulnerable migrant health services in UK EDs Dr Natasha Matthews	Bias Dr Tom Bannister	Fast-paced and focused. Oral abstract presenters deliver their research in just five minutes, sparking ideas and questions in rapid succession.
		Incidence, predictors and outcomes of blunt cardiac injury among polytrauma and isolated blunt chest trauma patients presenting to the ED of a Tertiary Hospital in Tanzania Dr Janet Jebichii Sugut	Lifestyle medicine Dr Beth Newstead	
	Bubblewrap live: Top PEM papers Dr Victoria Currie	End of life care decision making and communication in the ED: A mixed methods study Dr Anita Eseenam Agbeko	An EM culture of wellness Dr Chris Turner	
		Scaling up the Basic Emergency Care (BEC) Course for nurses in Ethiopia: Facilitators, challenges, and insights from an initial scoping study	Sexism in the workforce Dr Chelcie Jewitt	
		Upskilling and future-proofing human resources for health and enhancing health governance for universal health coverage and better-quality care	Panel discussion	
17:15 - 18:15	Drinks reception			
18:15	Close of Day 1			

29 April	Track A (F2F and virtual)	Track B (F2F and virtual)	Track C (F2F only)	Track D (F2F only)
08:45 - 09:30	Registration			
09:30 - 11:30	A5: David Williams Lecture and Rod Little Prize Papers			
	David Williams Lecture Professor Steve Goodacre			
	Rod Little Prize Papers			
11:30 - 12:00	Refreshment break			
12:00 - 13:15	A6: Big three studies	B6: Vulnerable populations and health inequalities	C6: Medicolegal	D7: Resus updates: Cardiac arrest
	SWIFT (Study of Whole Blood In Frontline Trauma) study results Professor Jason Smith	Patient focussed sexism in the ED Dr Katie Brill	Martha's Rule in the ED: Does it work? Dr Sally-Anne Wilson	2025 guidelines update Dr Chris Smith
		The NHS frail strategy and what it means for older adults in the UK Dr Fiona Wisniacki		SPEAR: Advancing life support beyond the algorithm Dr Jon Barratt
	CoMiT-ED 1 (Conservative Management in Traumatic Pneumothoraces in the Emergency Department; a Randomised Controlled Trial) study results Dr Edward Carlton	Towards a social EM Dr Ryan McHenry	Taking a human factors approach to improving diagnostic detection of aortic dissection Dr Austin Smithies	Defibrillation strategies Professor Andrew Lockey
	Panel discussion	Panel Q&A		JRCALC termination of resuscitation and related guidance: How will this impact EDs? Professor Charles Deakin
				Panel Q&A
13:15 - 14:15	Lunch			
14:15 - 15:30	A7: HALO sessions: ECPR	B7: Core EM: Recent updates and diagnostic challenges	C7: Death and dying	D7: Lightning papers and undergraduate awards
	HALO sessions: ECPR An interactive HALO session in which you'll see an expert demonstration of the procedure, discussion of the latest evidence, and an interactive debate that you can get involved with.	Updates in asthma Dr Stephen Fowler	Making dying better in the ED Dr Ali Griffiths and Dr Annette Rickard	Fast-paced and focused. Oral abstract presenters deliver their research in just five minutes, sparking ideas and questions in rapid succession. Plus hear from the winners of the undergraduate essay prizes.
		Updates in headache Dr Fayyaz Ahmed	The Cambridge Uncontrolled Donation after Cardiac Arrest pilot Dr Dominic Summers	
		Updates in stroke Professor Chris Price	Panel Q&A	
15:30 - 16:00	Refreshment break			

16:00 - 17:15	A8: RCEM grant updates	B8: Environmental impact	C8: Management challenges	D8: Early EM career considerations
	Understanding Psychological Distress And Therapeutic Environment in the Emergency Department (UPDATE-ED) Dr Rajendra Raman	How to turn your ED green: Tips and tricks for getting started Dr Daisy Stevens and Dr Sophie Underdown	Tackle real-world ED leadership dilemmas through interactive cases. Ideal for new consultants and those stepping into senior roles.	Navigate exams, portfolio pathways, and IMG experiences. This session will offer practical guidance for building a successful start in emergency medicine.
	Activation of inflammation and Coagulation after Trauma II (ACIT-II) Professor Daniel Horner	Going for gold: What a gold GreenED looks like Dr George Narayana and Dr Tim Spruell		
17:15	Close of Day 2			

30 April	Track A (F2F and virtual)	Track B (F2F and virtual)	Track C (F2F only)	Track D (F2F only)
08:45 - 09:30	Registration			
09:30 - 11:20	A9: David Williams Lecture and Rod Little Prize Papers			
	Maurice Ellis Lecture Dr Alison Sanders			
	William Rutherford International Award			
11:20 - 11:50	Refreshment break			
11:50 - 13:05	A10: HALO sessions: Thoracotomy	B10: Mental health	C10: Research studies reporting	D10: Moderated papers
	An interactive HALO session in which you'll see an expert demonstration of the procedure, discussion of the latest evidence, and an interactive debate that you can get involved with.	Address adolescent mental health in the ED and strengthen collaboration with external agencies for safer, more effective patient care.	The ED-WAITS Study: Waiting times in Emergency Departments inequalities and impact on health outcomes Professor Catherine Pope	Rapid-fire research. Oral abstract presenters deliver concise, three-minute insights into their work, showcasing innovation in EM.
	Dr Arun George, Dr Caroline Leech, Dr Zane Perkins and Dr Richard Steyn		Do we still need the collar? Results of the Duration of External Neck Stabilisation in the management of older and frail patients with a new odontoid Professor Matt Reed	
			COWS - Calcium levels on admission and the association with haemodynamic instability in paediatric major trauma Dr Owen Hibberd	
			FROG - Feasibility of randomising children and young people to invasive or non-invasive urine sampling Dr Thomas Waterfield	
			The CRAFFT (Children's Radius Acute Fracture Fixation) trial Professor Dan Perry	
13:05 - 13:50	Lunch			

13:50 - 15:40	A11: Trauma	B11: AI and digital transformation		
	MAGPIE - Inhaled methoxyflurane (Penthrox®) versus placebo for injury-associated analgesia in children Dr Michael Barrett	Discover how AI is reshaping emergency departments in this exciting session. From clinical decision support to workflow optimisation and future-ready digital innovation.		
	Top 10 trauma papers Professor Simon Carley			
	Panel Q&A			
	Closing remarks	Closing remarks		
15:40	Close of conference
